Bharathi M

FULL STACK MERN DEVELOPER

EDUCATION

B.E – Mechanical Engineering

Panimalar Engineering College

2017 – 2021

SKILLS

Frontend

- React JS
- Redux
- Javascript
- Bootstrap
- HTML
- CSS

Backend

- Express JS
- Node JS
- Rest API & JSON
- Mongo DB
- MySQL
- EJS

Miscellaneous

- Nginx
- Networks
- PM2
- AWS EC2
- AWS S3
- Git & Agile

Soft Skills

- Leadership
- Adaptability
- Debugging
- Team Player
- Problem Solving
- Deliver results

ACHIEVEMENTS

Legacy Responsive Web Design
Certificate – FreeCodeCamp

[Certificate Link](#)

JavaScript and Data Structures
Certificate – FreeCodeCamp

[Certificate Link](#)

Frontend Libraries Certificate –
FreeCodeCamp

OBJECTIVE

Detail-oriented and innovative software engineer with 2 years of experience in web development. Adept in full-stack development with a focus on the MERN stack. Seeking to leverage my skills in a challenging development role to deliver impactful technology solutions.

WORK EXPERIENCE

ZustPe Technologies Private Limited

Jul 2024 – Present

ZustPe Payments Private Limited

Jun 2023 – Jul 2024

PROJECTS

1) Domain : IOT(internet of things)

Role: MERN Developer

Environment: JavaScript, ReactJs, Nodejs and Mongo DB

Description

Worked on a full-stack application utilising NFC technology. Focused on building a mobile-friendly, responsive solution with efficient communication between devices via NFC.

Responsibilities

- Designed and developed both frontend and backend using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Created responsive and interactive UI components in React.js to enable real-time profile customization and preview.
- Built secure RESTful APIs CRUD operations and having knowledge on QR code generation.
- Implemented JWT-based authentication to ensure secure login and data protection.
- Optimized performance across both frontend and backend for smooth user experience on mobile and desktop devices.
- Enabled social media and contact link embedding for enhanced connectivity.

2) Domain: Fintech

Role: MERN Developer

Environment: JavaScript, ReactJs, Nodejs, Mongo DB and Nginx

Description

Proficient in backend development using Node.js, Express.js, and MongoDB, with practical knowledge of optimizing APIs for payments, reminders, and user authentication. Familiar with deployment practices using Nginx, emphasizing performance, security, and scalability

Responsibilities

- Developed and maintained backend and frontend using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed RESTful APIs for payment gateways, cart systems, and user authentication.
- Having Knowledge on payment gateway integration to facilitate seamless financial transactions
- Built and optimized an reminder system for timely notifications and payments.
- Implemented secure user authentication/authorization using JWT and OAuth.
- Performed code optimization and database performance tuning, reducing query execution time and improving response rates.
- Deployed applications with Nginx for load balancing, reverse proxy, and high availability.
- Implemented robust error handling and logging systems for effective production monitoring.

3) Domain: Telecommunications

Role: MERN Developer

Environment: JavaScript, ReactJs, Nodejs, Socket IO and Mongo DB

Description

Hands-on experience with SSO (Single Sign-On) authentication mechanisms and working knowledge of protocols and services such as SMPP, Click-to-Call, and META used in telecom and communication systems.

Responsibilities

- Developing the backend architecture using Node.js and MongoDB to ensure high scalability and performance for the application.
- Implemented Single Sign-On (SSO) integration, allowing users to authenticate seamlessly across multiple platforms with a unified credential system.
- Integrated SMPP (Short Message Peer-to-Peer) for sending and receiving SMS messages, enabling communication with users in real time.
- Integrated Click-to-Call API to allow users to initiate calls directly from the web interface, enhancing customer support and interaction.
- Integrated WhatsApp API to facilitate messaging capabilities, allowing users to communicate through WhatsApp directly from the platform.
- Designed and developed RESTful APIs to handle various functionalities such as user management, communication features, and data retrieval.

4) Project Name: Website Development

Role: Technical Lead

Responsibilities

- Collaborated closely with the client to understand the project's goals and requirements, ensuring the landing page met their business objectives and target audience needs.
- Led the design, development, and deployment phases, ensuring the landing page was responsive, fast-loading, and optimized for SEO.
- Utilized React for the front-end to create an interactive and user-friendly interface, integrating modern design principles and responsive layouts.
- Managed deployment, coordinating with the testing team to ensure a smooth launch and high-performance results on all devices and browsers.
